Bosch – A brand you can trust.

“I have always acted according to the principle that it is better to lose money than trust. The integrity of my promises, the belief in the value of my products and in my word of honour have always had a higher priority to me than a transitory profit.”

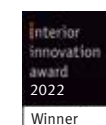

Robert Bosch, 1921

Bosch in every detail. German Engineered.

Every detail of every appliance has been carefully designed, produced and tested by our engineers to fully satisfy the highest standards in quality, performance and convenience. The result is cutting-edge technology, timeless design and remarkable ease of use, reducing the workload for you in the kitchen and consistently delivering perfect results.

Awards

Bosch because...

Perfect results.

We at Bosch, always believe in achieving perfect results by exceeding customer expectations and setting new standards with our superior technology. While the PerfectBake plus feature with artificial intelligence in Built-in oven made baking super simple, our new Brass Burner hob provides faster cooking with equal heat distribution leading to the perfect dish.

Precision with effortless cleaning.

Our stylish beveled glass and durable glass finish make cleaning just a matter of a single swipe to deliver complete ease of utility. Our chimney have been engineered with Self Clean Technology, which allows for the self-cleaning of the chimney's interiors at one click and the ovens too come equipped with multiple cleaning functions like Pyrolytic cleaning and Eco-clean.

The power of German design.

The simple and timeless German design ensures that your kitchen will always be your favourite place in the house. This design approach of Bosch home appliances has won over 200 International design awards in the past 5 years.

Awards

Efficiency of the brand.

For over 130 years, we are building strong on Robert Bosch's core principles of providing exceptional customer service by manufacturing superior quality products with highly-skilled resources. At Bosch, right from our product design to our relationship management, everything is engineered around you.

Catering to support our customers.

Our customers are the center of our foundation and we pride ourselves in delivering the highest levels of satisfaction and happiness to our consumers. Which is why, we've trained our engineers to deliver top-class installation with minimum intrusion. Additionally, there is post purchase service support and one can also avail warranty schemes to cover product life.

Built-in appliances that stand out.

The New Black range impresses with its modern design. The Black elements are discreetly incorporated such as the operating ring in our oven along with a thin stainless steel-look handle with an embossed Bosch logo that highlights the elegant design, adding an extra premium feel. At the same time, the Black glass True Brass burner hob and the designer chimney with beveled glass create a visual relationship between the appliances, enabling the perfect design match.

Superior cooking with a superior look.

OVENS & MICROWAVES

Steam cooking

For gentle and healthy food preparation.

TFT Touch display

Easy to operate thanks to the control ring with text and images/icons.

Bosch Assist

Automatically sets the optimal cooking mode, temperature, and time for countless dishes.

PerfectBake Plus sensor

Automatically adjusts baking settings and tells you exactly when to remove dishes from the oven.

PerfectRoast Plus meat probe

Lets you know when your roast is perfectly tender and how many minutes you still need to wait.

Microwave function

For fast warming of food or use in combination with convection for quick cooking.

True kitchen art.

Discover a seamless design that integrates perfectly into the kitchen environment. With a stainless steel look and the Digital Control Ring engraved in the glass – a design element found in the entire Series 8 oven range. For full cooking ease, the range also comes with a brilliant TFT Touch Display with clear texts and images that provide easy navigation for the various settings.

Thin Handle

A thin stainless steel-look handle with an embossed Bosch logo highlights the elegant design.

Digital Control Ring

With the Digital Control Ring, you can adjust your oven settings intuitively. Just move your finger across the ring engraved in the glass on the control panel and confirm the desired setting.

TFT Touch Display

Additionally, you are supported by a high-resolution TFT Touch Display: clear, vivid images and info texts take you through each step as you navigate the program options. Thus, you enjoy a complete overview and full control over your appliance's functions.

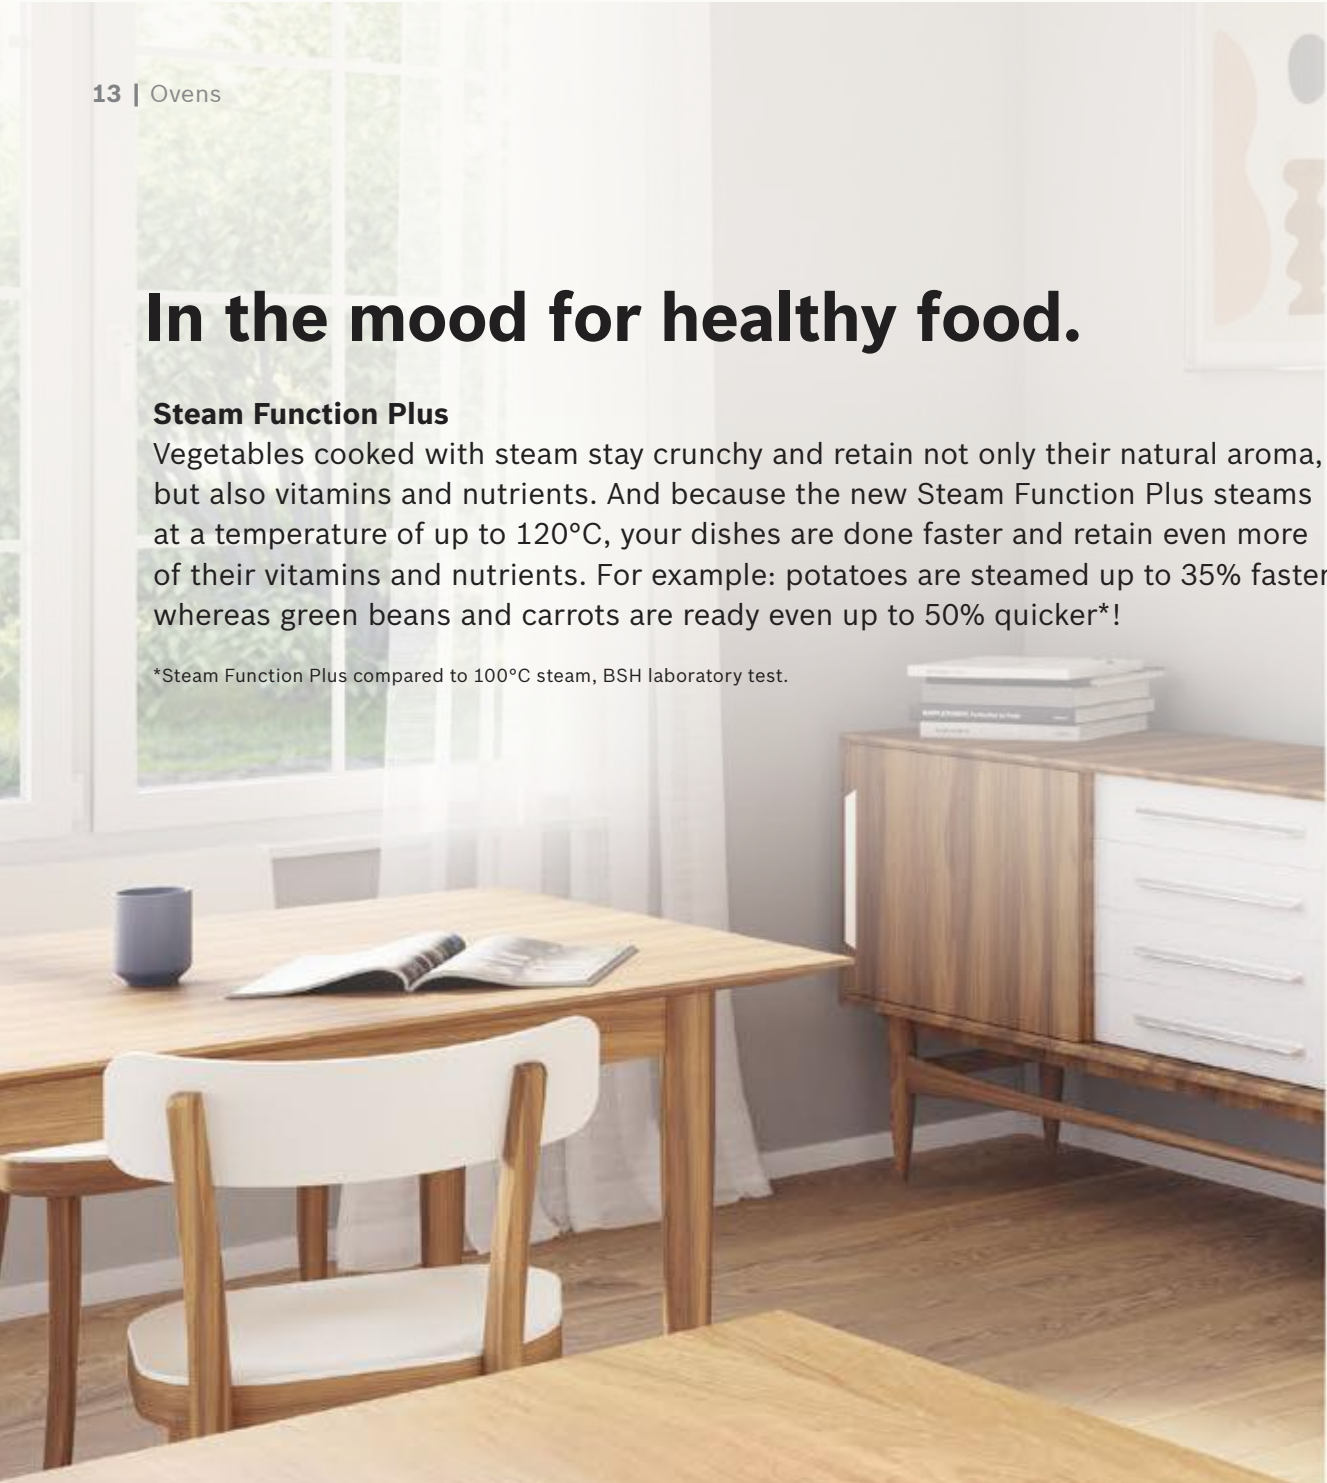

In the mood for healthy food.

Steam Function Plus

Vegetables cooked with steam stay crunchy and retain not only their natural aroma, but also vitamins and nutrients. And because the new Steam Function Plus steams at a temperature of up to 120°C, your dishes are done faster and retain even more of their vitamins and nutrients. For example: potatoes are steamed up to 35% faster, whereas green beans and carrots are ready even up to 50% quicker*!

*Steam Function Plus compared to 100°C steam, BSH laboratory test.

More vitamins and nutrients

Steaming broccoli at a temperature over 100°C, retains up to 26% more nutrients and up to 8% more Vitamin C than conventional cooking methods**. Whereas steaming red pepper at a temperature over 100°C retains up to 12% more Vitamin C!**. They also keep their full, natural flavor, so you can go easy on the extra seasoning and use much less salt when cooking. In short – healthy food has never tasted better.

**Steam Function Plus compared to cooking in boiled water, University of Hohenheim test results 5/2022.

The perfect ingredient for perfect cooking results: steam.

What could be nicer than the fragrance of fresh baked bread – with a perfect crust on the outside and still fluffy on the inside? Or a perfect Sunday roast, juicy on the inside and crisp on the outside? It’s easy when you use steam functions of our ovens.

Added Steam

By adding the right dose of steam precisely when it’s needed, the Added Steam function gives your food mouth-watering texture, inside and out. It’s ideal for baking bread, giving your loaves a deliciously crispy crust while keeping the inside fluffy. You can also use it for superb results when roasting and re-heating. Simply fill up the water container and your oven does the rest.

Perfect Steam

Do you want to bake bread or roast chicken with Added Steam for more crisp and moisture? Thanks to Perfect Steam, precise sensor constantly measures the oxygen, calculates the humidity level in the oven cavity and automatically regulates the steam amount. As soon as you select the Added Steam function or a program with steam support, the sensor is activated and regulates the perfect amount of steam. Perfect Steam does it all automatically.

Steam Boost Function

Home-baked bread tastes best. And by adding as much steam into the oven as possible in a very short time during baking, it’s even easier to succeed. Just activate the Steam Boost Function. As soon as the steam is ready, you can inject individual shots of steam as needed – for bread that’s crisp outside and nice and fluffy inside.

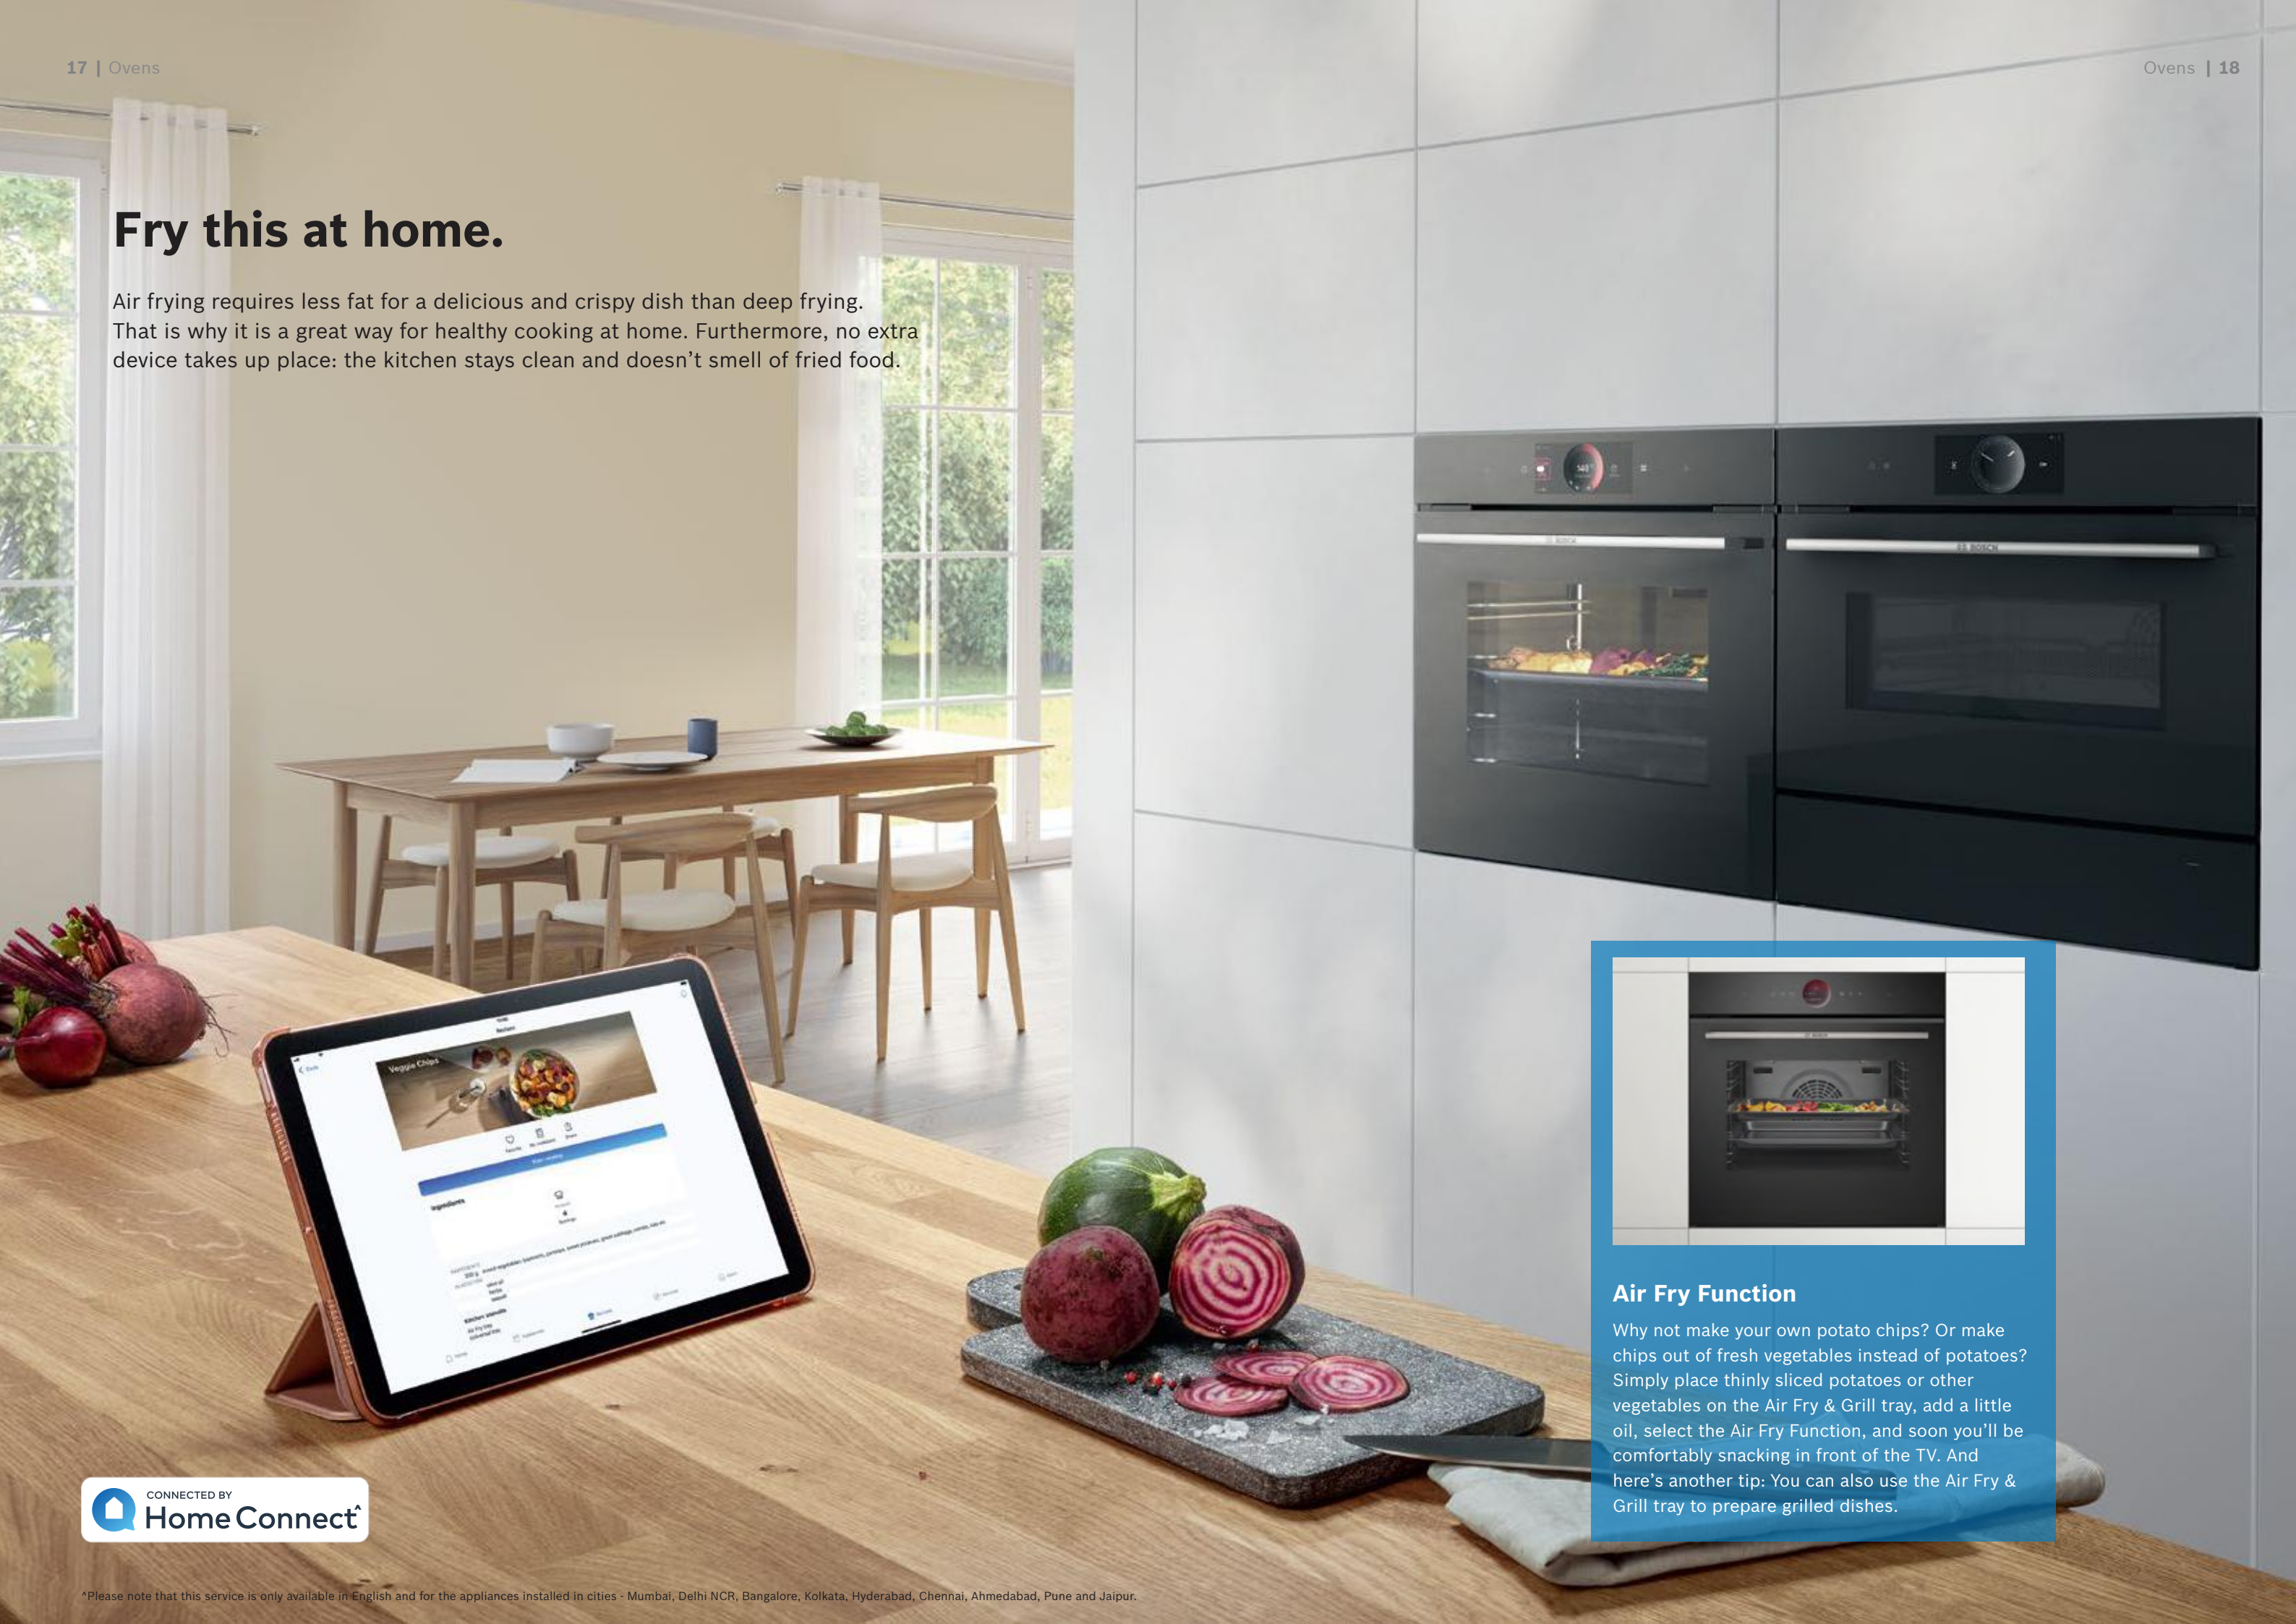

GRANDMA’S SECRETS

Readying the baking pan

Before baking, it’s advised to grease the baking pan generously. It’s done so that the food comes out easily. The secret here is that you must use parchment paper to ready your pans instead of going the traditional way.

Fry this at home.

Air frying requires less fat for a delicious and crispy dish than deep frying. That is why it is a great way for healthy cooking at home. Furthermore, no extra device takes up place: the kitchen stays clean and doesn't smell of fried food.

Air Fry Function

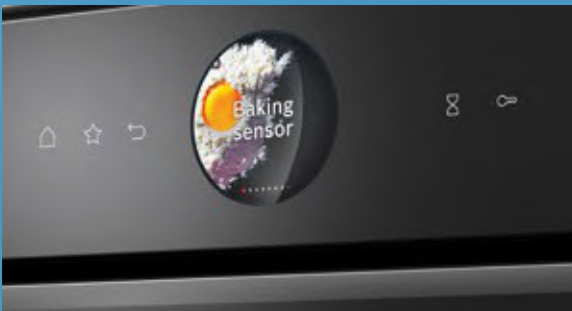

Why not make your own potato chips? Or make chips out of fresh vegetables instead of potatoes? Simply place thinly sliced potatoes or other vegetables on the Air Fry & Grill tray, add a little oil, select the Air Fry Function, and soon you'll be comfortably snacking in front of the TV. And here's another tip: You can also use the Air Fry & Grill tray to prepare grilled dishes.

*Please note that this service is only available in English and for the appliances installed in cities - Mumbai, Delhi NCR, Bangalore, Kolkata, Hyderabad, Chennai, Ahmedabad, Pune and Jaipur.

Cooking in the best company.

The new Series 8 ovens with Artificial Intelligence support you with the collective experience of thousands of cooks around the world. The new ovens learn based on a growing amount of anonymized data from numerous baking and roasting processes. The more and more frequently households use the ovens equipped with Artificial Intelligence the more precisely your oven makes the prediction about the exact end time of your cooking process. Home Connect and Artificial Intelligence support features like PerfectBake Plus or the PerfectRoast Plus – and thanks to that you have the entire experience of thousands of cooks around the world at your fingertips. For perfect results today. And even better ones tomorrow.

PerfectBake Plus

Never before has baking been so simple. Select a dish, like “cake in the tin” or “Muffins”, press Start and your oven takes over from there. The best part: thanks to Artificial Intelligence and the Baking Sensor measuring the humidity inside your oven you can see how many minutes are left until your dish is ready to serve. To enjoy PerfectBake Plus, just connect your oven to your registered Home Connect account.

^Please note that this service is only available in English and for the appliances installed in cities - Mumbai, Delhi NCR, Bangalore, Kolkata, Hyderabad, Chennai, Ahmedabad, Pune and Jaipur.

Timing is everything.

For roasting, whole fish and chicken, timing is everything. PerfectRoast Plus takes the guesswork out of knowing when your dishes are perfectly tender. The meat probe uses three measuring points to check the temperature of your dish. When the selected internal core temperature is reached, your dish is roasted to perfection.

PerfectRoast Plus

Thanks to Artificial Intelligence, the oven can even tell you how many minutes are left until your dish is ready to serve, so that you can time your meals to perfection. To enjoy PerfectRoast Plus, just connect your oven to your registered Home Connect account.

In addition, the Meat Probe Assistant supports you when you don't know the best oven setting for achieving your preferred degree of doneness. If you want your beef tenderloin to be "medium rare", for example, the Assistant will recommend the right core temperature.

GRANDMA'S SECRETS

Add more of the baking soda

If the recipe required you to use half teaspoon of baking soda. This will bring the recipe into the correct proportion, although you may end up with more of the dessert than you anticipated. Use this method only if you're sure of the exact quantity of extra baking soda that you added.

Turns every dish into a delight. And every location into a kitchen.

Home Connect app

Want to unlock the full potential of your appliance? Just connect your oven to your registered Home Connect account (www.home-connect.com) to control it from anywhere you want, whenever you want, the way you want. Benefit from exiting possibilities offered by our numerous ecosystem partners. Start and stop cooking functions, change settings and manage favourites – all while away from your kitchen. Settings are synced between the app and the oven. You'll be informed via push notifications as soon as the programme is done. Software downloads keep your oven up to date.

Remote Control

"Did I leave the oven on?" will no longer cross your mind. Introducing ovens with the Home Connect Remote Control function for your peace of mind. Check on your oven's status, and conveniently control and monitor your oven remotely via the Home Connect app in your phone.

Remote Diagnostics

Remote Diagnostics is here to solve your home appliance troubles at the touch of a button. Call our Hotline and book a remote diagnosis appointment for your connected appliance via the Internet. The Bosch customer service then remotely screens your appliance, locates the problem area and gives you clear advice. In case the problem persists, a Bosch service technician, equipped with all the necessary parts will pay you a visit.

Oven Assistant

Oven Assistant helps you choose the right programme for your dish. Mention the dish you want to prepare via the Home Connect app or your Amazon Alexa voice control device and your oven will suggest suitable settings or programmes and switch directly to your selection.

At last, someone in the house who enjoys cleaning up.

Anyone who has ever cleaned an oven by hand knows how exhausting and time-consuming it can be. However, this chore is a thing of the past, thanks to our pyrolytic self-cleaning function. You won't waste a minute on cleaning, leaving you more time to enjoy cooking.

Pyrolytic self-cleaning: the oven that cleans itself

During the pyrolytic cleaning function, the oven heats up to 480°C to burn off grease and food residue. This means you never have to clean your oven again.

Simply follow these 3 steps:

- 1. Activate the pyrolytic cleaning function.
- 2. Choose from three different cleaning levels, depending on the degree of residue that has accumulated.
- 3. Once the program is finished, wipe off the thin layer of ash in the base of the oven.

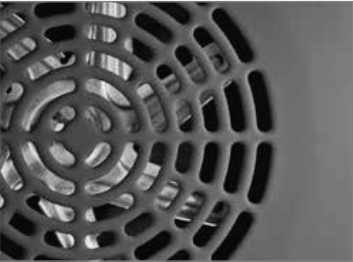

EcoClean direct: makes cleaning easier

While your dishes bake or roast, the special direct coating of microfine ceramic particles on the oven cavity walls absorbs grease and residue and breaks them down through oxidation.

Simply follow the below steps and reduce your cleaning time significantly*:

- 1. Activate the EcoClean direct cleaning program.
- 2. Once completed, clean remaining surfaces that don't have the special coating.
- 3. Wipe the base of the oven and inside of the glass door.

The direct coating also regenerates every time you heat the oven and continues to do so for the entire service life of the appliance.

Universal pan and baking tray with ceramic non-stick coating

In addition to the classic universal pan, Bosch is now offering a new universal pan and baking tray for Series 6, 4 and 2 ovens with a ceramic non-stick coating. This special non-stick coating makes the surface easy to clean. And the ceramic coating has another advantage: You no longer need to use parchment paper or to grease the tray, which makes baking, roasting and cleaning much easier.

Cleaning Assistance

Is your oven lightly soiled and in need of a quick cleaning? Just place approximately 400 ml of water with a drop of liquid detergent in the bottom of the oven cavity and select the proper cleaning programme. The environmentally friendly cleaning system softens baked-on residue, making it much easier to wipe off afterwards.

Easy-clean door

Most Bosch oven doors are extremely easy and time-saving to clean. Whereas the cover is often bolted onto the actual oven door, on selected models you can easily release the right and left sides with the touch of a finger and remove the pane for cleaning. The chore of removing the screws is gone forever.

*Please remove all accessories when activating the specific EcoClean Direct program.

#Metal racks may show slight discoloration after prolonged use of the pyrolytic function. To prevent this you may choose to remove the wire racks during the pyrolytic cycle. Features may vary depending on models. Please check individual product specifications.

GRANDMA'S SECRETS

Take your cookies out when just the edges have hardened

If you wait for them to 'cook all the way through then they'll break your teeth!

Ovens | Heating Functions

Because there’s hot –
and then there’s hot.

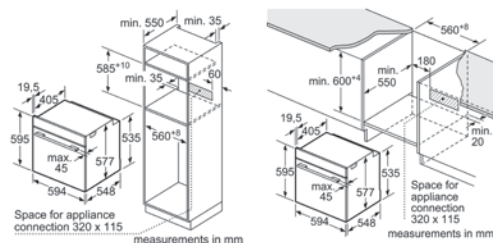

Baking and roasting to perfection require the precision of temperature and the appropriate heating functions. Bosch's ovens have been designed to give you a range of heating functions, from 4D Hotair to Hotair Eco, to suit all your cooking needs.

Function*	Recommended for	
 Steam Function Plus Gently steam vegetables, meat, fish and cereal; juice fruit; blanch food. In order to reduce the cooking time, food can be steamed at above 100 °C, up to 120 °C.	Steamed food items (Idli, Dhokla, Steamed Veggies, etc.)	
 Air Fry Cook until crispy, on one level with little fat. Especially suitable for food that is usually fried in oil, e.g. chips. The fan circulates heat from the grill element around the food at high speed. The exhaust air is extracted more intensively from the cooking compartment.	Fried food items (Chips)	
 4D Hotair This feature of our oven evenly distributes heat from the ring heating element in the back panel to the cooking compartment in the front.	Cakes and small baked items (Muffins, biscuits)	
 Hotair Eco This feature evenly distributes the energy optimized heat from the ring heating element in the back wall to the cooking compartment in the front. Thus, allowing you to cook selected dishes on one level without having to preheat the oven.	Cakes and small baked items (Muffins, biscuits)	
 Top and Bottom heat This feature ensures that even heat is emitted both from the top and bottom of the oven. Making it ideal for traditional baking and roasting.	Cakes and bread	

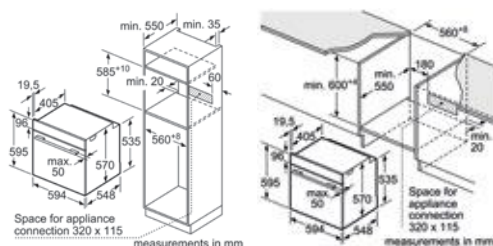

Function*	Recommended for	
 3D Hotair With the 3D element around the fan, the hot air distributes and circulates evenly throughout the oven.	Tarts and savory cakes	
 Bottom heat This feature can be used for slow cooking and during the final stage of baking for a crispy base that isn't dry.	Pizza and pies	
 Pizza setting This feature is perfect for dishes like pizza which require a lot of heat from underneath and moderate amount of heat from the top.	Pizza and baguette	
 Hotair grilling This feature with its grill element and the on and off fan switch helps you roast to perfect crispiness.	Poultry, whole fish and larger pieces of meat	
 Full width grill This feature helps you grill flat items like kebabs with ease.	Steak and sausage and making toast	
 Half width grill This feature is ideal for grilling of small quantity of food which require a smaller surface area.	Small portion of steak, sausage and making toast	
 Top and bottom heat Eco This feature is suited for single shelf energy efficient cooking.	Any cooked food	

*To cook on all four levels simultaneously, four wire racks are required for best results. For up to three levels, all accessories are suitable, i.e. universal tray or baking tray. Features may vary depending on models. Please check individual product specifications.

Designed to create perfect symmetry in your kitchen.

Heat, defrost, roast or grill anything, thanks to up to 1000 watts and up to five power levels. The AutoPilot program helps achieve the best possible results with very little effort.

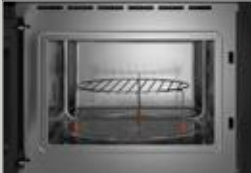

8 Automatic programs with weight settings

The microwave oven lets you cook selective dishes easily, thanks to its intuitive 8 Automatic Programs. Just place your food, and enter the weight to be cooked. The microwave oven will automatically set the time required to cook the dish based on the weight. No more guessing game.

High power levels

The 1000 watts and five power levels of our ovens let you heat, defrost, roast or even grill any food item.

Cleaning Assistance

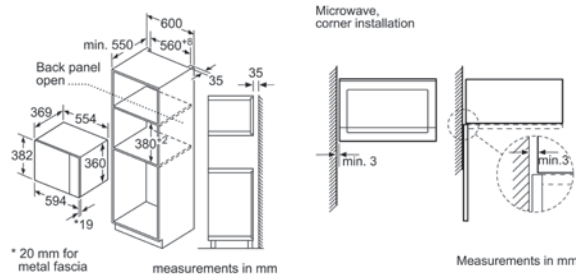

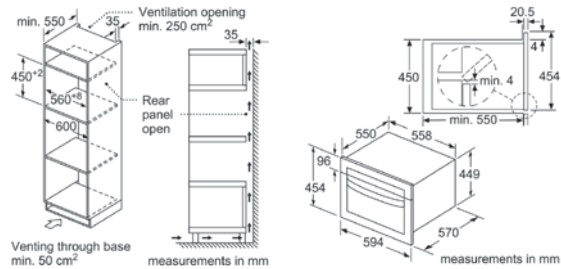

Less cleaning effort thanks to the new cleaning option, which can be especially used for cleaning of light soiling.

Defrost and cook

Our ovens save your time by allowing you to cook and defrost the food simultaneously without you having to thaw it.

GRANDMA'S SECRETS

Peel ginger with a spoon

No need for a special tool to de-skin this oddly-shaped root. Because the peel is fairly thin, simply scrape a metal spoon down the side and around the tricky rounded edges of the ginger to flake the skin away.

**The key to perfect
and precise meals.**

GAS HOBS

Intense Blue Flame

Faster cooking with
high efficiency burners.

Zero Leak Design

Limits blockage due to
spilling ensuring consistent flame
output.

Sword shaped knobs

Our Sword shaped knobs
provide better grip in
navigating the flame.

Flame Failure Safety Device (FFSD)

Automatically shuts off the
gas supply when flame goes off.

True Brass 3D

Our burners with 3 flame rings
for precision cooking and
flame control.

Stylish toughened beveled glass

Indian cooking is class apart and
so is our stylish beveled glass for style
and good-looking kitchens.

BOSCH

For the chef in you!

India is a proud land that celebrates food and Indian cooking is characterized by a rich diversity culinary experiences. Well, the different styles of cooking co-relate with the different kind of cooks. The Weekend Cook, the Everyday Cook, the Meticulous Cook, the 2-minute Cook, the Gourmet Cook, the Traditional Cook, the Minimalistic Cook. Making everyone a master chef in their own way.

Whoever the cook or however you cook, Bosch Burners can take on anything right from rare, medium and well done. Especially engineered for elaborate Indian Cooking which relies on an abundance of ingredients, our burners generate an even flame to ensure that the food is cooked evenly in super busy Indian kitchens where all the action happens. Where, when the breakfast rustle-up ends, the lunch simmering starts, then teatime snacks sizzle, after which dinner stirring happens... the process repeats itself, day after day. Heavy-duty Indian kitchens need heavy-duty burners like BOSCH.

No matter what's your cooking style, True Brass hobs can take on anything.

The Everyday Cook

Complementing a work life balance is a balanced meal with simple and healthy ingredients. Creating extra special dishes, ensures every meal time is family time. And to give peace of mind to the everyday cook, the intense blue flame from our brass hobs guarantee even cooking every single day.

The Gourmet Cook

In the kitchen, the Gourmet Cooks are the true heroes that bring in meticulous detailing into their culinary art. One hero deserves another one which is our True Brass 3D Burner. It has precision flame control for usage that's really easy. All the 3 rings are burn and perform bright to ensure full capacity cooking that's intense, creative and satisfying.

The Minimalistic Cook

An uncomplicated cooking style defines the minimalist cook who uses minimum ingredients and maximum efforts. Our elegant hobs are the perfect choice for them as they are just as minimalist, timeless, easy to maintain and ideal for daily use.

The 2-Minute Cook

Their mantra is 2-minute cooking from start to finish. Even though always hurried, how well food is cooked should keep pace. And to certify that this pace is kept, our two wok burners perform in full capacity to cook the dish in the minutes they want it to.

The Traditional Cook

Maa believes if it is not traditional and cooked slow, it is not sensational. Hours are juggled cooking tasty dishes, that vanish within minutes. And with our ergonomically designed hobs, Maa gets enough room to be flexible and juggle between dishes, without any utensil clashes.

The Weekend Cook

Unlike the everyday cooks, these are a rare sight. On weekends their culinary skills begin Chilling to them is cooking something for the weekend. They love to experiment, showoff their style and stir up a distinct dish to relish with their partner. And our sealed burner base ensures there is no blockage that comes in-between the weekend cooking creativity.

The Power of Indian Cooking, Hobs that unleash it.

Made from pure brass with technical precision, it is empowered with 13.7 KW* cumulative power output to take on heavy-duty cooking, effortlessly.

*Applicable in select models.

True Brass 3D

Indian Cooking is all about large and hearty portions. Made from pure brass so you can rely on our burners with 3 flame rings that come with precision flame control that enables easy usage. The internal flame helps to simmer food and for full capacity intense cooking, all 3 flame rings are initiated. You could call it the distinctive rings of trust, that makes control smooth, precise and instinctive. It helps meat, daals and vegetables cook evenly. This makes Indian cooking reliable, safe, versatile and most importantly enjoyable.

Intense Blue Flame

In every Indian kitchen, a range of ingredients and intense sentiments come together to create food, most lovingly. It is this intensity that finds way into the intense blue flame of BOSCH Hobs. The blue flame renders complete combustion where right amount of cooking gas comes in contact with sufficient levels of oxygen. Leading to food being cooked evenly at any flame setting.

Double the volume

The configuration of our hob is designed to comprise two large burners which further helps in cooking in large volumes easily.

GRANDMA'S SECRETS

Use tamarind and jaggery

It's very important to have a nice flavor balance in your dish. This would mean sweetness, saltiness, bitterness, sourness, and some umami. Jaggery would provide some sweetness and tamarind would give the gentle sour taste.

Zero Leak Design

Milk that boiled over, that occasional gravy overflow or droplets of tea that escaped, now can be managed really well. Our best in class Bosch Hobs are engineered with a fully sealed burner base that does not allow any food and liquid particles to get inside the body. Thereby ensuring no blockages. This marvel engineering has another benefit too. It keeps pests at bay and is easy on maintenance.

Flame Failure Safety Device in all burners (FFSD)

What happens when a sudden gust of wind or the whirring fan above puts the burner flame to rest? Our FFSD feature gets into action mode. It detects if the gas is on, even though the flame is off and automatically cuts off the gas supply. This safety feature prevents accidents from taking place in the kitchen. Bosch's hobs provides this safety feature in all the burners.

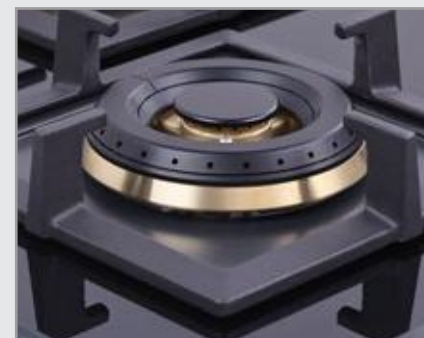

GRANDMA'S SECRETS

Cook your onions for the right length of time.

If it's a vegetable curry, the onions should be cooked for 15-20 minutes until golden, while for lighter curries the onions only need to be cooked until translucent.

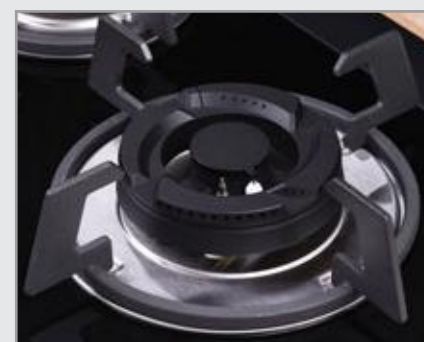

The complete range of burners.

True Brass 3D

Indian Cooking is all about large and hearty portions. Made from pure brass so you can rely on our burners with 3 flame rings that come with precision flame control that enables easy usage. The internal flame helps to simmer food and for full capacity intense cooking, all 3 flame rings are initiated.

True Brass 3D Wheel

Indian Cooking can be just as demanding as it is rewarding. Our Full Brass 3d Burner crafted from Pure Brass, suits the needs of Indian cooking. As you stir and twirl, the consistent flame rises like a swirl on the well-designed wheel wok burner system.

True Brass 2D

When food is cooked in Indian Kitchens, even the neighbors drop by, uninvited. Adhering to Indian needs, this burner is molded out of pure brass. Equipped with 2 rings of flames and multi-flame control, it glows with a precise flame, providing adequate heat for cooking and an even heat distribution.

True AL 2D

Indian cooking is a labor of love with textures and flavors of tadka to savor. Our True AL 2D Burners knows this. Aluminum's excellent high heat conductivity properties, makes the transfer of heat quick for faster cooking. Cook all that you want on our AL 2D Burners.

The Bosch Hob Safety Promise.

We hail from a lineage that's dedicated to Bosch Safety and Quality Promise. To you, we promise a relationship that is enduring. One that renders excellence at every stage. Maintaining a substantial degree of safety and security, we provide innovative future ready solutions backed by an approach that is result oriented. What's more, the brushed steel finish and the durable glass tops of our hobs are an aesthetic feast for your eyes and promise maximum safety for a wobble-free even cooking experience.

**Our products are tested
100% before leaving
the factory**

**The Bosch Safety
Promise is built into
all our burners**

Other Features

Ergonomic burner placement to accommodate multiple vessels

Indian kitchens use exceptionally big utensils to cook for large families. Our burner placement can accommodate the biggest of 'kadhais or utensils'. It also provides more than enough space for you to juggle between all the dishes.

Stylish toughened beveled glass

Indian cooking is class apart and so is our stylish bevel glass for style and good-looking kitchens.

Utensils are placed firmly with cast iron pan support

Large or small, tall or short, heavy or light, whatever the kind of utensils, our designs ensure that they stay firm and don't shake while you are cooking.

Made by Bosch Made for India

German engineered hobs that are designed and built to take on all challenges of Indian cooks and their cooking styles.

Elegant design - Sword knobs for better grip

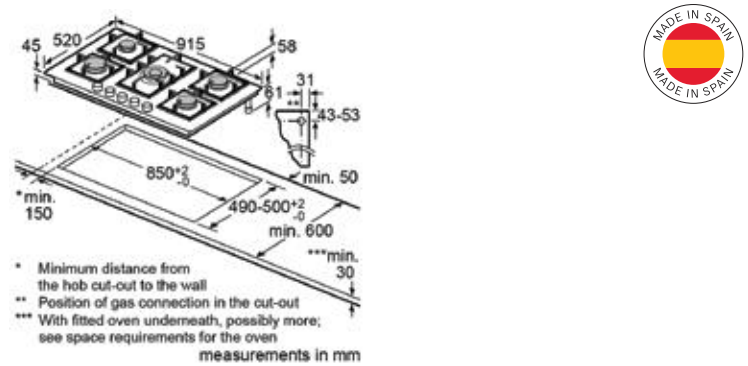

The unique sword shape design of the knobs, makes Bosch knobs delightfully easy to use and the precision of the flame stays in your control. Be it the tadka or the garnishing, our Sword Shape Knobs provide better grip in navigating the flame.

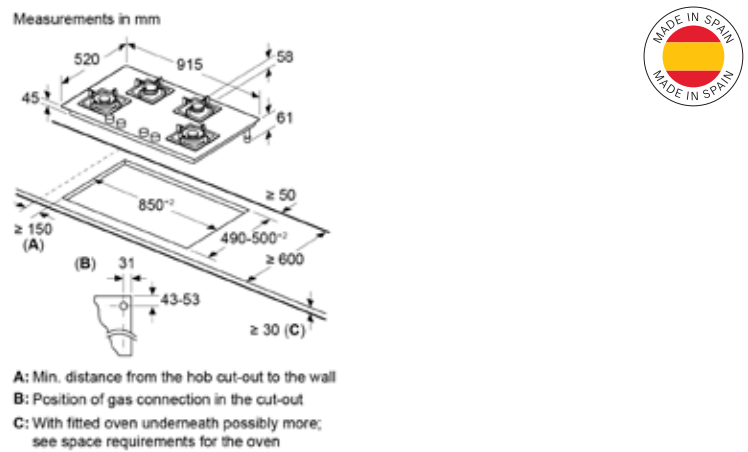

2 year Warranty

For peace of mind and stress free cooking guarantee, our hobs come with 2 years comprehensive warranty.

Lights up your day.

INDUCTION HOBS

Pan recognition sensor

The pan recognition sensor detects the size of your pots and pans, to determine the size of your cooking zone.

Child lock

This lock helps to ensure the safety of small hands by locking the control panel on your hob.

TouchSelect

The Touch select panel on our induction hobs lets you easily select the cooking zones, and set the individual power levels.

QuickStart

Just select the power level and start cooking without delay.

ReStart function

The "ReStart" function will restore your last cooking settings if you turn off the induction stove by accident.

Easy to clean

The ceramic glass on our induction hobs means they are easy to clean if something spills on them.

Induction Hobs

Why induction?

Save time for the important things in life. Our induction cook-tops with PowerBoost function increases power output to selected cooking zone by approximately 50 percent. Which means you can easily heat up 2 liters water in just 4.7 minutes*.

Why is it so fast, so easy to clean and safe?

Induction hobs are easier to clean than traditional hobs, because the ceramic glass doesn't get as hot. Any spillages can be quickly and easily wiped away. With an Induction hob, micro-currents are generated in the bottom of the pot. Consequently, heat is only created when the pan is connected to the hob & heating will stop as soon as it's removed, which means it's far safer than cooking with traditional hobs.

GRANDMA'S SECRETS

Tricks to Reduce Excess Salt in Curries

Make balls of the flour dough about 2-3 depending upon the quantity of your dish and put them in the curry.

Induction hobs

Multiple cooking zones. 17 cooking levels. Endless possibilities!

Efficiency

TouchSelect:

The Touch select panel of our induction hobs lets you select cooking zones with ease and directly set the individuals power levels.

QuickStart:

Start cooking quicker. The QuickStart function automatically detects the location of your pot and displays the cooking zone on the control interface. Just select the power level and start cooking without delay.

ReStart function:

If you happen to spill something on the induction or accidentally switch it off, The restart function will restore your last selected settings on your hob if you switch it off accidentally. Simply press the main power switch within 4 seconds.

Touch control-Digital display:

Put your constant worry to rest. The intelligent digital display of our hobs alerts you when your food is ready, while keeping track of your total cooking time as well.

Boost function for all zones:

The 32 cm cooking zones of our inductions is specially designed for an action of up to 5.5kW power. Which means, you can cook your rice three time quicker than usual.

Performance

17 Power levels:

The 17-stage power setting function of our hobs gives you complete control over every recipe by letting you set the cooking zone in increments of 0.5. E.g., 0.5, 1, 1.5, 2, etc.

PowerBoost – now with even more power!

PowerBoost channels increased power to a selected zone to quicken the cooking process. With PowerBoost, you can boil 2 liters of water almost three times faster than on a conventional glass-ceramic hob.

Pan recognition sensor:

The pan recognition sensor detects the diameters of your pots and pans accordingly to determine the size of your cooking zone. And if you remove your pots without switching the induction off, the indicator on the control panel will become inactive until it detects your pots and pans again.

Simplicity

Stage residual heat indicator:

The countdown timer on our hobs allows you to set your desired cooking time and notifies you when the time is up. The cooking zone automatically deactivates once the countdown is completed.

Easy to clean:

Our induction hobs are made of ceramic glass which don't heat up as much. This makes the cleaning of any spillage super convenient and safe.

Child lock

Maximum safety for tiny hands. Lock your hob's control panel and prevent accidental little chefs from 'helping out' and hurting themselves. Enjoy the reassurance of maximum safety for both you and your loved ones.

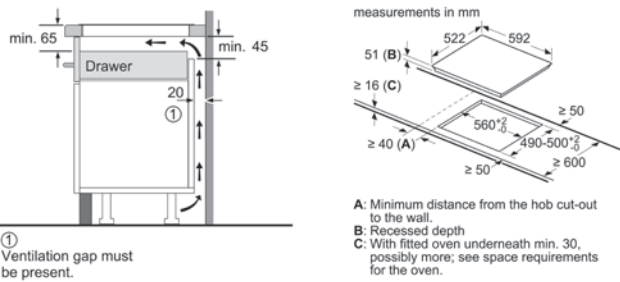

Safe to use:

With your safety in mind, our induction hobs only heat up when a pot or pan is placed on it. And heating stops immediately once your remove the pot.

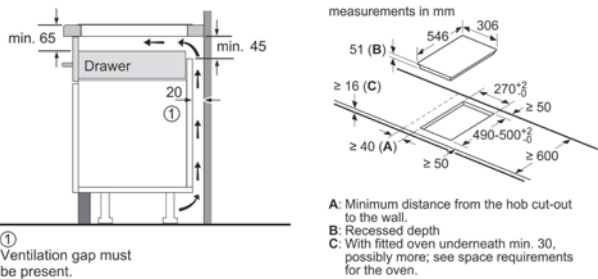

Induction Hobs

Model	PIE651BB5I
60cm 4 Induction cooking zones Direct select Ceramic glass	
Features	<ul style="list-style-type: none">• Touch control-digital display• QuickStart function• 17 Power levels• Automatic pan recognition sensor• ReStart function• Digital 2 stage residual heat indicators• Boost function for all zones• Safety time-Switch-Off• ChildLock proof• Power management function

Cooking in Fresh air.

CHIMNEYS

Booster Mode

Maximum ventilation for Indian-style cooking.

Smart Motor Technology

Motor with high suction power at minimal noise level.

Self-Clean Technology

Cleans itself with a click of a button.

Self-clean Reminder

It indicates when the chimney needs to be cleaned, so you no longer need to guess when to clean the chimney.

Gesture Control

Now control the chimney with just a wave of your hand.

Delayed Shut Off

This extracts the leftover smoke and automatically turns off the chimney in 10 minutes.

You'll look up with gratitude.

Self-clean Technology:

Cleaning a chimney has never been this easy, stress-free and gratifying. The Bosch Chimney comes with Self-Clean Technology that cleans itself with just a click of a button. The interior heats up and dissolves the accumulated grease, which flows down into an easily detachable tray. All you have to do is remove the tray and discard the oil.

Self-clean Reminder:

To make life much easier, it also comes with a Self-Clean Reminder feature. It indicates when the chimney needs to be cleaned, so you no longer need to guess when to clean the chimney.

Smart Motor Technology:

Not everything powerful makes noise. Experience Smart Motor Technology with a powerful motor coupled with the Archimedean Air principle that provides higher suction with lower noise. It also helps lower energy consumption, giving you a happy cooking experience and complete peace of mind.

Booster Function:

Indian cooking is indeed very dynamic, with different cooking techniques. Perfect for Indian cooking, the Booster Function provides maximum ventilation whilst heavy cooking like deep frying puris, tempering dal, shallow frying tikkis, roasting meats, etc.

A chimney that’s easy to use, and easier to control.

Delayed Shut off:
While fresh aromas fill your kitchen as you cook, smoke and other odors to linger along after you're done with cooking. But now you can get rid of all the odors by activating the Delayed Shut Off option. This extracts the leftover smoke and automatically turns off the chimney in 10 minutes, leaving your kitchen fresh and clean.

Gesture Control:
Got your hands full in the kitchen? Now control the chimney with just a wave of your hand with Gesture Control. Turn it on or control the speed without even touching it. Experience hands-free control that’s absolutely simple.

GRANDMA’S SECRETS

Cook seed and whole spices at the start

whole spices should be added at the start, cooking them 'until they release natural oils and you can smell the aromas'.

The right chimney

Match your chimney with your kitchen to keep your kitchen smelling clean and fresh. The right chimney replaces air in your kitchen ideally 10 times an hour.

When choosing a hood, always match its air delivery power to the size of your kitchen. An effective extractor should be able to replace the air in your kitchen 10 times an hour.

$\times 10 =$

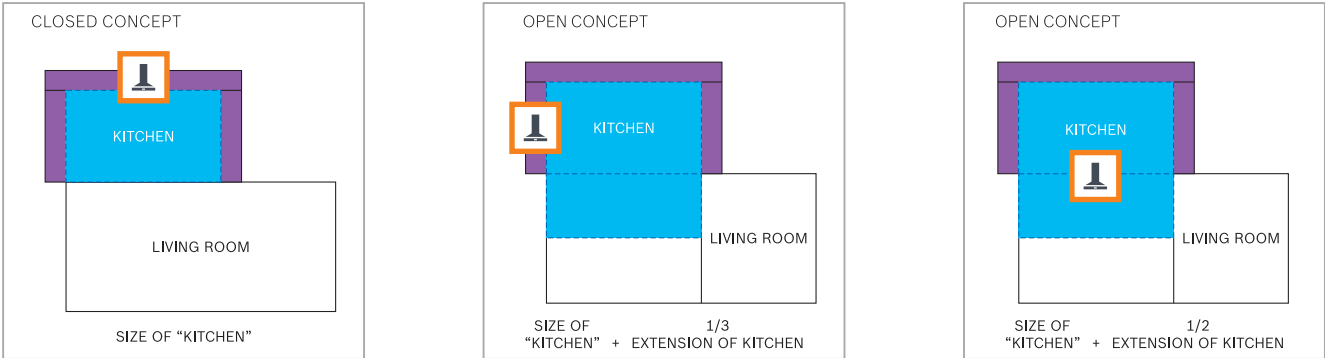

Volume of
Your Kitchen
(m³)

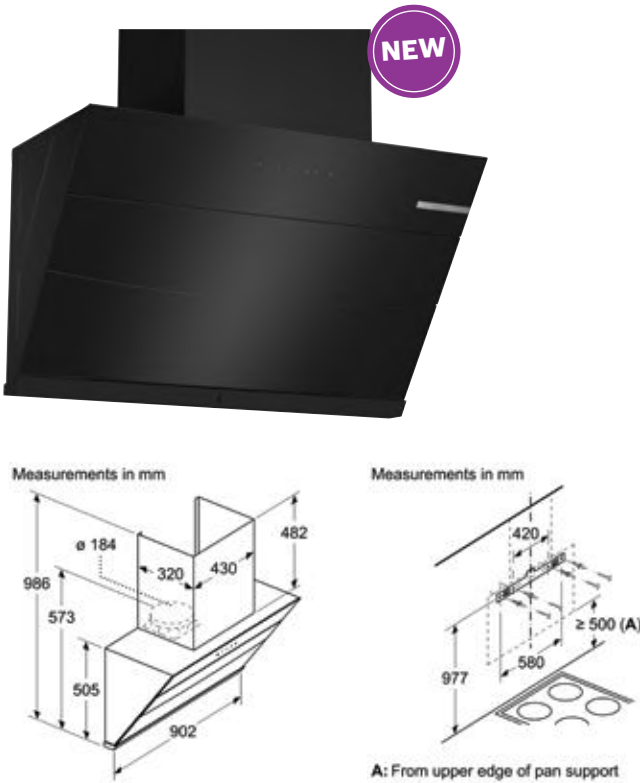

Minimum
Extraction
Rate Required*

Measuring Suction power for open kitchen.

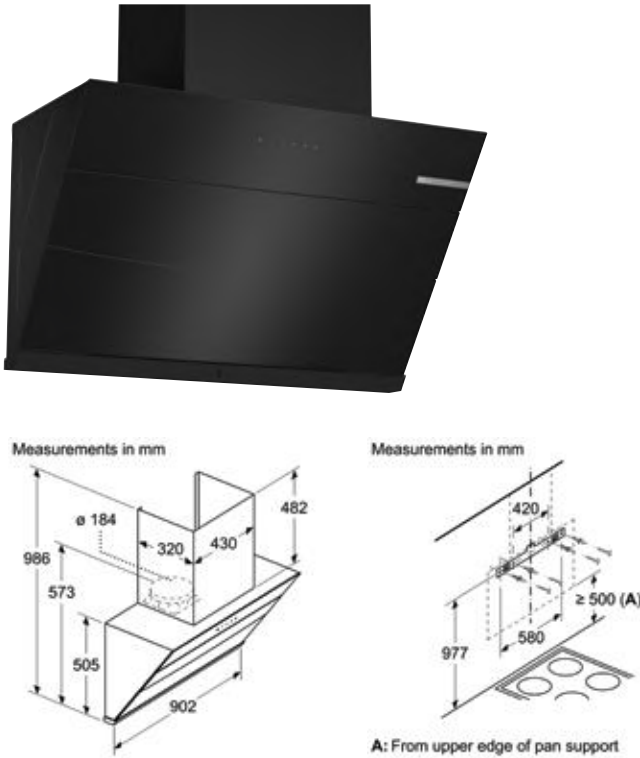

For open layout kitchens, identify the location of your hood and estimate your kitchen volume in the following manner:

Redefine dishwashing

DISHWASHERS

Zeolith Drying Technology

Absorbs moisture and converts it to heat using the natural mineral Zeolite. This results in a quicker and more efficient dry.

Cutlery Drawer

A cutlery tray for cutlery and small dishes.

Smart Dosing

A unique feature in Bosch where Detergent tablets are dissolved efficiently in a special tray preventing these tablets sticking in between dishes, pots and pans for an enhanced cleaning performance.

Spray Arms

The curved shape of the lower spray arm and the upper spray arm ensures that the jets of hot water are spread evenly to each and every corner of the vessel.

Rackmatic

By pushing a simple clip on the upper basket, you can adjust its height at 3 levels vertically to accommodate Indian utensils of different sizes.

Good hygiene starts with germ-free dishes.

Bosch built-in dishwashers are designed to fit in your new or existing kitchen with style and ease. With thoughtful features like RackMatic and Home Connect, doing the dishes is now easier than ever before.

Perfected for Indian Utensils
The Intensive 70°C program designed to clean oily & masala stained Kadhais, pots, pans, etc.

Home Connect **NEW**
The IOT enabled remote-access ecosystem lets you connect directly with your dishwasher from anywhere, through the Home Connect^ App. Now you can control everything on the go.

Hygienic Wash
With Bosch dishwasher water heats up to 70°C & kills 99.99% germs & bacteria.

RackMatic **NEW**
The 3-Stage Rackmatic flexible basket fits almost everything your kitchen has to offer.

Clutter-free kitchen
Bosch Dishwasher helps you keep your kitchen platform clutter-free and spacious.

No manual pre rinse required
Directly load the utensils in the dishwasher after scraping the leftovers, without any need to manually pre-rinse them.

DosageAssist
The DosageAssist feature maximizes the effectiveness of detergent tablets by dropping them into a specially designed tray that is targeted by water jets, resulting in a tablet that dissolves evenly under control ensuring optimal usage.

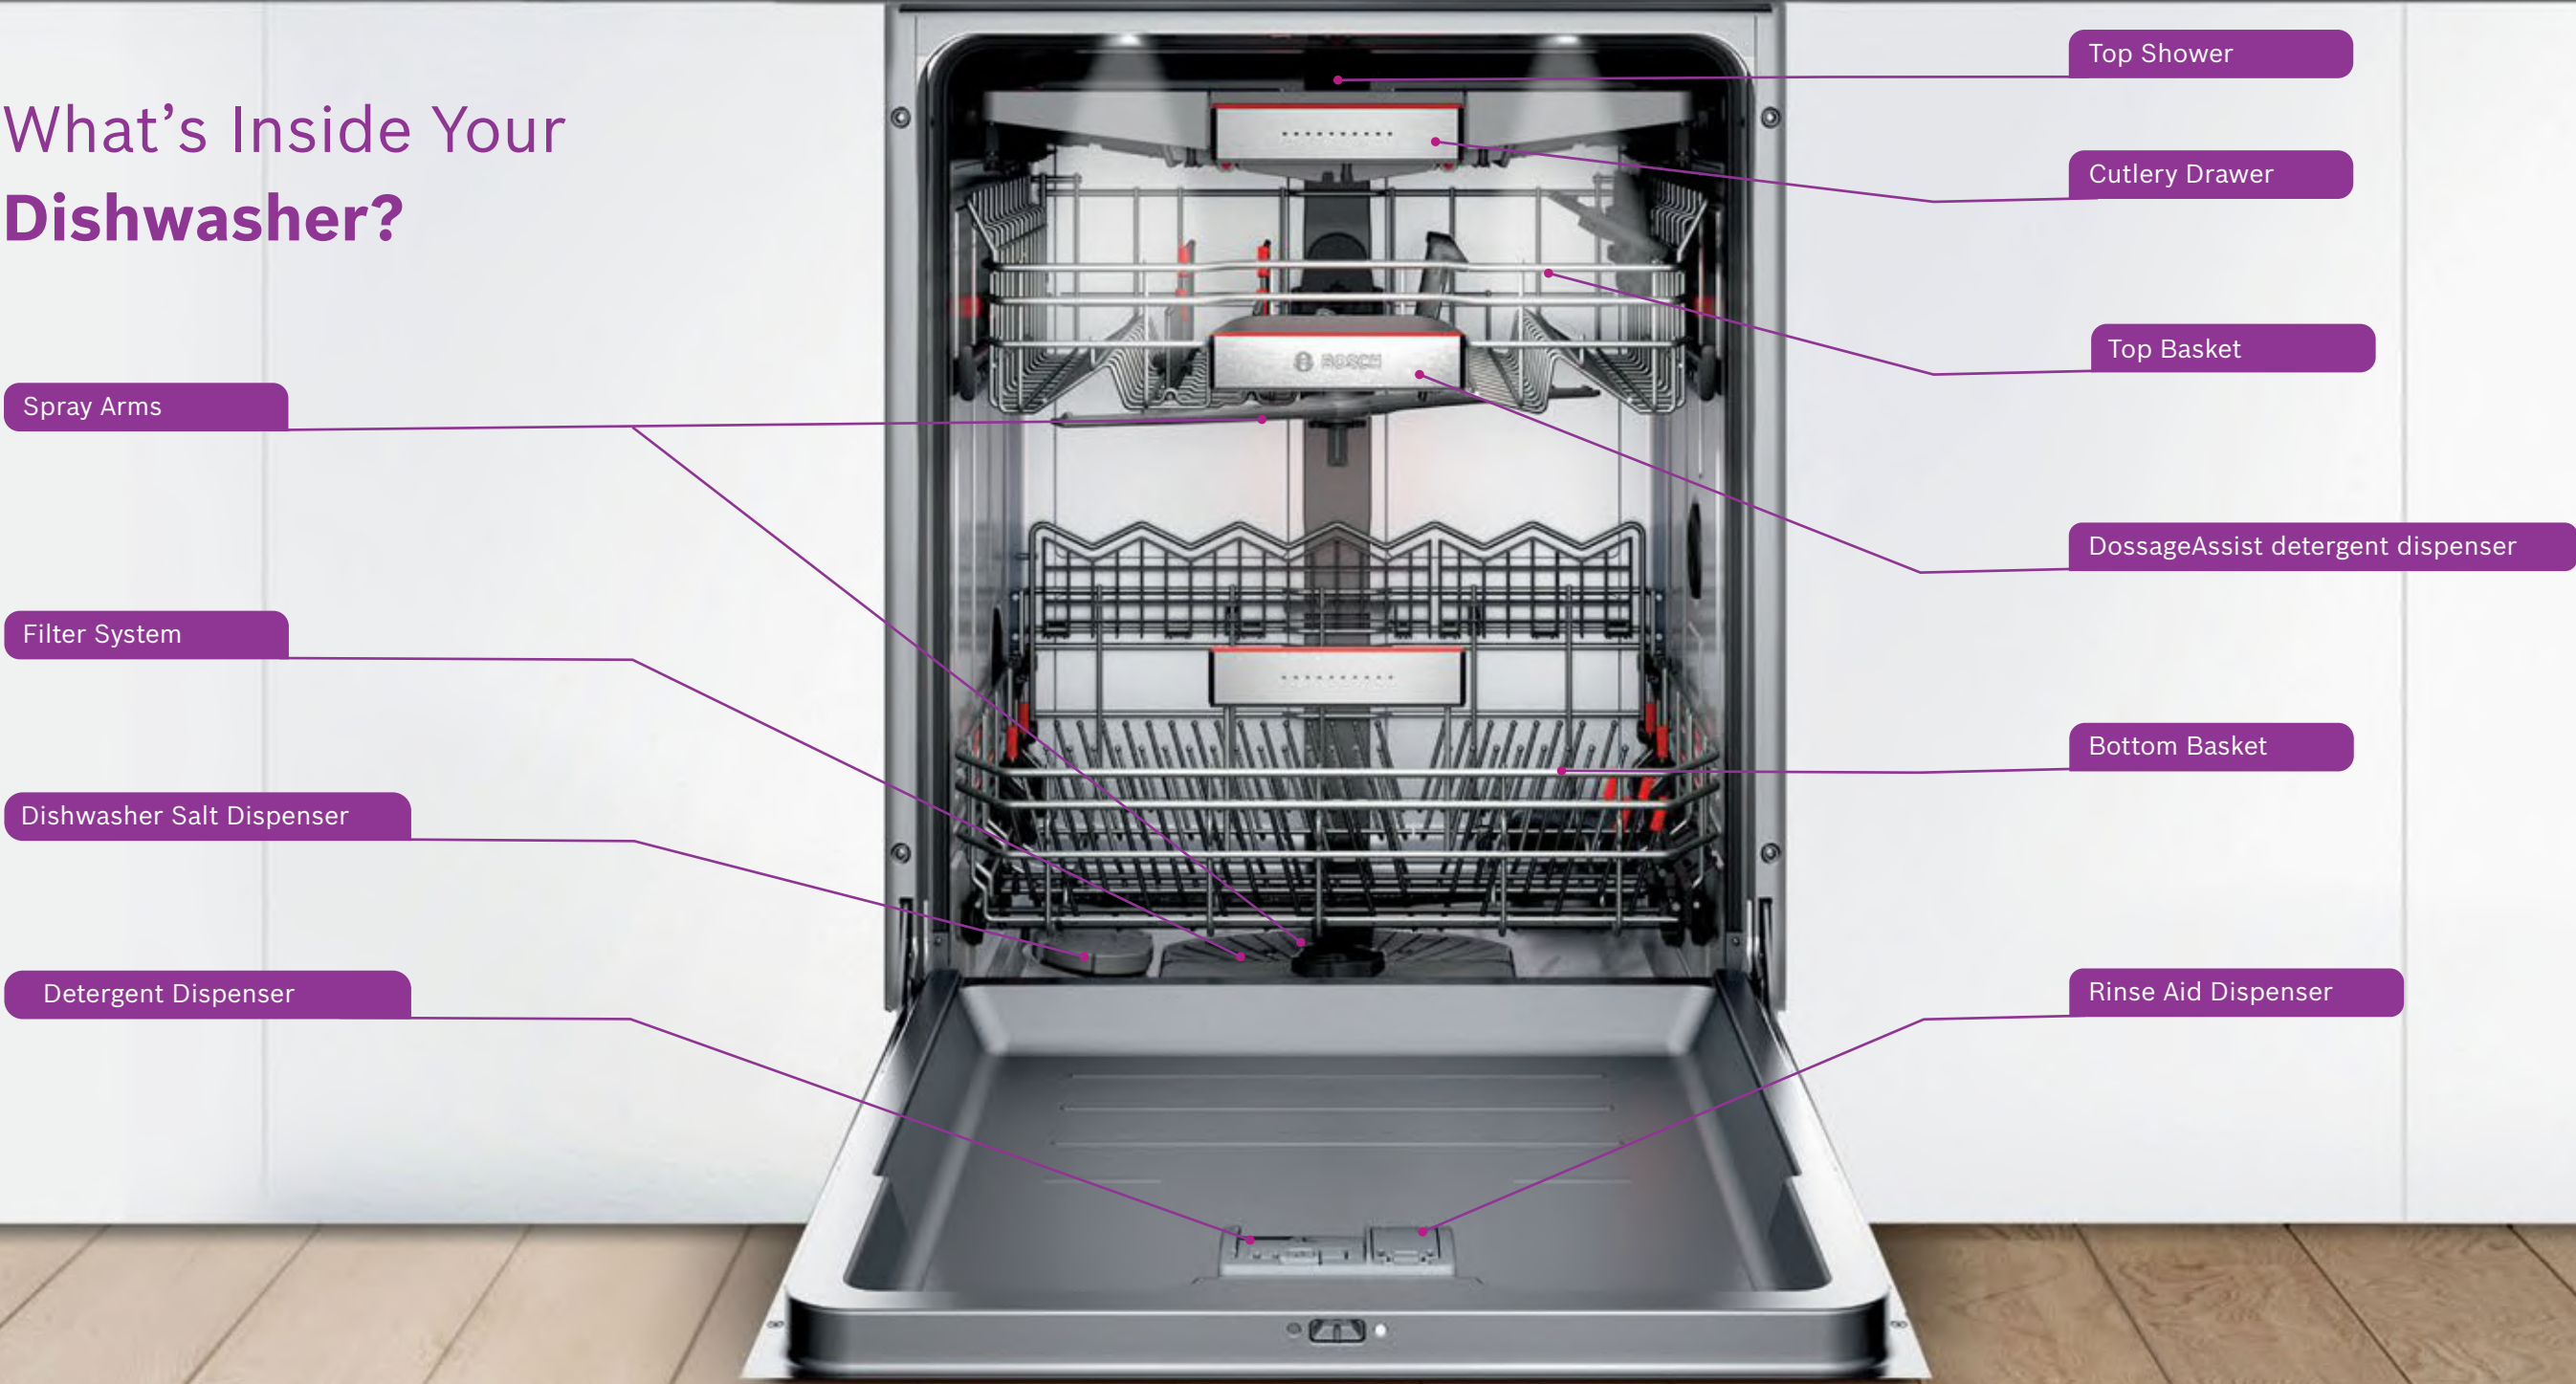

Glass Protection Technology
Bosch Dishwashers with glass protection technology constantly regulates the degree of hardness of water to ensure that valuable glasses and crockery are washed with special care.

*Please note that this service is only available in English and for the appliances installed in cities - Mumbai, Delhi NCR, Bangalore, Kolkata, Hyderabad, Chennai, Ahmedabad, Pune and Jaipur.
